

## ***Abstract***

**Title:** Presence and effectiveness of the pick-and-roll in chosen ŽBL and Eurocup Women teams (comparative study)

**Objective of thesis:** This Master's thesis is further development of the Bachelor's thesis that was defended in May 2014. The objective of the thesis is to find out the presence and effectiveness of pick-and-roll. This research was done on selected Eurocup Women teams and consequently compared with results of the ŽBL teams according to the Bachelor's thesis.

**Methods:** Regarding the quantitative research, the thesis was based on the collective method of secondary information in that case secondary statistical analysis and direct observation of recorded data.

**Results:** The presence of pick-and-roll in ŽBL teams was comparable to the Eurocup Women teams. The teams playing European competition had similar effectiveness of pick-and-roll as the teams playing ŽBL (Czech competition).

**Key words:** Basketball, ŽBL (women basketball league), Eurocup Women, combination based on screen, basketball plays
